ABOUT ME

Final-year BS Computer Science & IT student (NED University, expected 2026, CGPA 3.3) with practical experience in full-stack web development and computer vision. Developed React-based e-commerce gaming site and multiple other projects related to full stack development . Led computer vision logic in FYP Real-Time Vehicle Anomaly Detection System (YOLO, OpenCV, Python, Streamlit) for real-time traffic anomaly flagging. Freelancing on Fiverr with React, WordPress, Node.js/PHP. Eager for web/AI roles.
